

MC

New in Recycling:

The all in one crushing machine

A trend-setting combination of down-sizing, granulation, and ball shaping for a wide variety of solid materials

Input material

WEEE Scrap material, pre-treated,
Automotive Shredder Residues (ASR)
Materials of screening trommels
Metal fractions
Minerals
Brittle fracturing materials

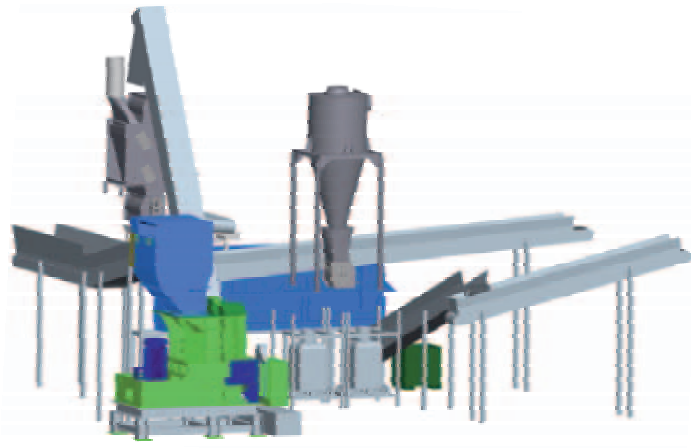

Key Machinery

MC Functional description

- Flexibility in crushing principle
- Multi use options in crushing and material processing
- Usefully adaptable to requirements of feeding material, throughput, and output qualities
- Robustness of the construction
- Less wear as a matter of principle
- Advantages in maintenance by quick and easy accessibility

Customer's benefits

- Flexibility in crushing principle
- Multi use options in crushing and material processing
- Usefully adaptable to requirements of feeding material, throughput, and output qualities
- Robustness of the construction
- Less wear as a matter of principle
- Advantages in maintenance by quick and easy accessibility

Tests

Check the MC performance on our test installations.

We keep our plants at your disposal for the treatment of your products.
